## Professional Summary

Azure DevOps & Cloud Infrastructure Engineer with 10+ years of experience supporting enterprise infrastructure, cloud modernization, CI/CD automation, and security operations within banking and enterprise environments. Experienced in Azure DevOps, Terraform Infrastructure as Code (IaC), Azure Container Apps, Azure Landing Zones, RBAC governance, containerized deployments, and PowerShell automation. Proven ability to streamline deployments, improve operational efficiency, enhance cloud security, and support highly available production environments. Skilled in intermediate Python scripting for automation, infrastructure support, and operational task optimization.

## Core Technical Skills

- **Cloud Platforms:** Microsoft Azure, Azure Virtual Machines, Azure Container Apps, Azure Virtual WAN, Azure Landing Zones
- **DevOps & IaC:** Azure DevOps, Azure TFS Pipelines, YAML Pipelines, Pipeline Templates, Variable Groups, Release Gates, Environment Approvals, Terraform, Jenkins, Git Bash, Azure CLI, CI/CD
- **Containers:** Docker, Azure Container Registry (ACR), Container Apps
- **Identity & Security:** Entra ID (Azure AD), RBAC, Azure AD Connect, Service Principals, Intune, CISSP
- **Automation & Scripting:** PowerShell, Intermediate Python, Bash Scripting, Terraform Modules, Build Automation
- **Monitoring Tools:** SCOM, SCCM, Varonis, IBM Tivoli, BMC Patrol, Azure, Monitoring
- **Virtualization:** VMware vSphere/ESXi, Hyper-V, Citrix XenApp
- **Operating Systems:** Windows Server 2022/2019/2016/2012, Linux Ubuntu
- **Networking:** TCP/IP, DNS, DHCP, VLANs, Palo Alto Panorama, Wireshark

## Professional Experience

**Infrastructure Analyst** | First Canadian Title Insurance, Oakville, ON | Nov 2023 – Present

- Administer Azure subscriptions and cloud infrastructure supporting enterprise production environments.
- Designed and deployed Infrastructure as Code (IaC) solutions using Terraform modules to standardize Azure resource provisioning across environments.

- Built and maintained Azure DevOps CI/CD pipelines using YAML templates, variable groups, environment approvals, and release gates to improve deployment governance and automation.
- Implemented Azure Landing Zones and RBAC governance models to improve security and subscription management.
- Deployed and supported Azure Container Apps, Azure Container Registry, and Docker-based workloads for microservices applications.
- Configured secure authentication using Azure AD App Registrations, Service Principals, Managed Identities, and RBAC assignments.
- Automated operational tasks and reporting processes using PowerShell scripts, reducing manual administrative effort.
- Managed SCOM infrastructure across UAT and Production environments, including custom monitoring rules and recovery automation.
- Supported Azure Virtual WAN and Hub-and-Spoke network architectures for multi-region connectivity.
- Implemented Terraform remote state management in Azure Storage Accounts to ensure consistent infrastructure deployments.
- Managed Microsoft Intune device enrollment and endpoint administration for enterprise users.

**Senior System Security Analyst** | Bank of Nova Scotia, Toronto, ON | Feb 2022 – Nov 2023

- Supported secure application delivery processes within Agile and DevOps environments.
- Managed deployment pipelines using Azure DevOps, Jenkins, Azure TFS Pipelines, and ACCP Right Lane.
- Performed security validation and compliance checks during application release cycles across Development, UAT, and Production environments.
- Implemented security standards and controls to reduce risk associated with unauthorized code deployments.
- Collaborated with development and operations teams to maintain secure CI/CD practices and deployment governance.

**System Support Specialist** | Bank of Nova Scotia, Toronto, ON | Jun 2015 – Feb 2022

- Administered enterprise Windows server environments, patch management, and compliance activities.
- Implemented and supported Citrix XenApp environments in production.
- Automated recurring administrative tasks using PowerShell scripting.
- Worked with SCOM administrators to optimize monitoring, alerting, and incident resolution.
- Supported application deployments, upgrades, DR exercises, and production troubleshooting activities.
- Managed VMware virtual infrastructure across private and public cloud environments.

**Senior Technology Specialist** | GTL Consulting, Mississauga, ON | Sep 2013 – Jun 2015

- Managed infrastructure environments consisting of 500+ physical and virtual servers.
- Performed VMware ESX/ESXi upgrades, migrations (P2V/V2V), and SAN integrations.
- Configured Windows servers, Active Directory, DNS, Group Policies, and virtualization infrastructure.
- Supported enterprise deployments, troubleshooting, and infrastructure upgrades within ITIL environments.

**System Administrator** | Rogers Communications Inc., Brampton, ON | Feb 2012 – Jul 2013

- Supported large-scale VMware virtualization infrastructure with 4,000+ virtual servers.
- Installed and configured ESX clusters, vCenter Server, SQL Server clusters, and Windows server environments.
- Provided Tier-3 production support and participated in 24/7 on-call operations.
- Performed system upgrades, server builds, and migration activities following change management procedures.

**Education & Certifications**

- Bachelor of Science in Electronics Engineering
- AZ-104 Microsoft Azure Administrator
- AZ-400 Azure DevOps Engineer Expert
- Certified Information Systems Security Professional (CISSP) – 2023
- VMware Certified Associate
- MCSE Windows Server 2012
